Chris,

There are multiple OSC's assigned to the Wichita Rad sites (Todd C, Megan S., Tom M., Randy S., James J.,) Randy has a handle on all the sites (so does Chuck Hooper, AWMD) and can relay the specifics of all these sites. He is headed out this morning; but, he will try to coordinate/you re. our EPA response to MO Coalition before he leaves. Per my conversation with Cecilia, he will be our Agency spokesperson for all the Wichita Rad sites.

Thanks

Ken

p.s. Call him on his cell phone – thanks!

I assume James is also listed somewhere as a point of contact for one or more of these sites?

I might suggest that we provide her with a summary explanation of the "Emergency Removal Action" process, and how it (and these sites) differ from West Lake. Anyone care to propose some language for that?

Randy Schademann and scott Hayes are the poc on the wichita sites. They are referred to us by KDHE when there are no PRPs otherwise KDHE oversee cleanups under their authorities.

Obviously a series of questions in the context of West Lake. Please advise how/whom you wish to respond to this.

**Subject:** Radiation - Garwin, INC

Hello,

My name is Victoria Lubner and I am an intern with the Missouri Coalition for the Environment. I am currently working on an issue with West Lake Landfill in Bridgeton, MO which has radioactive waste. Currently the West Lake Landfill is a Superfund site. With some research I found the Garwin, Inc site in Wichita, KS which you are listed as the Site Contact for. I have a couple of questions that I am hoping you will be able to answer. How did the site in Wichita qualify for the Emergency Removal Action? After the site qualified for the Emergency Removal Action what was the process like for clean up? What actions were taken?

Any information will be helpful and if you know someone that can help me further in understanding the process of Emergency Removal Action please forward my email on.

Looking forward to hearing from you.

Thanks,

Victoria Lubner
